## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/25/03 has been entered.

### ***Response to Arguments***

3. Applicant's arguments filed 8/18/03 have been fully considered but they are not persuasive.

Applicant has amended the independent claims to reflect that commercial information is automatically displayed for a single program column. Examiner notes that Schein discloses automatically displaying commercial information for a single program column. Schein discloses this limitation at Column 22, Lines 3-8. Note that a preview window 528 can be used for all types of promotional, descriptive, or contextual video or graphics, such as a short preview of the show that is currently being highlighted. In other words, Schein teaches that a show is being highlighted; window 528 shows a short preview relating to the show being highlighted in the program column.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2611

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Schein et al. (U.S. Patent No. 6,002,394).

Referring to claim 1, Schein discloses transmitting program guide information together with a broadcasting program (Column 12, Lines 20-24). Schein also discloses commercial information that corresponds to program guide information (Column 22, Lines 3-8), which is automatically displayed on a program guide screen in a receiver when a cursor is moved onto a program column of said program guide screen (Column 22, Lines 3-8, also see arguments above) is transmitted with program guide information (see transmitting an advertisement database in Column 12, Lines 28-29 and Column 7, Lines 65-67). The examiner refers applicant to the arguments above to again stress automatically displaying commercial information in response to moving a cursor onto a program column.

Referring to claim 2, Schein discloses that the commercial information contains image data (Column 11, Lines 56-57).

Referring to claim 3, Schein discloses that a digital signal can have separate bitstreams that contain video, audio, and program guide information (Column 6, Lines 51-60), and that data related to a television program guide title is related to an advertisement (Column 26, see Claim 14).

Referring to claim 4, Schein discloses that commercial information can be accessed on a remote computer via the Internet (Column 20, Lines 4-9), and that a computer on a computer network (Internet) can be given an IP address (Column 18, Lines 20-43).

Referring to claim 5, Schein discloses hierarchical levels for program schedule data (Column 9, Lines 20-67 and Column 10, Lines 1-28) for a program guide, which contains advertisements (Column 22, 10-18). Schein shows that a first hierarchical level (Channel Data Table) is smaller by holding only the channel required for viewing at a specific subscriber's receiver, while the second hierarchical level (show list) contains start times and additional scheduling data for 24 hours worth of program for every channel listed in the Channel Data Table (Column 9, Lines 20-62 and Figures 5 and 6). It is inherent that the Channel Data Table is smaller than the Show List Table because of the large amount of data storage that would be required to hold 24 hours or weeks worth of show times for each program contained in the Channel Data Table.

Referring to claim 6, Schein discloses a receiver for separating program guide information from a received broadcasting signal (Column 12, Lines 41-44). Schein also discloses displaying commercial information in a part of a display area (see Figure 21A and Column 24, Lines 1-20), and an electronic program guide screen including program columns corresponding to a plurality of programs based on the separated program guide information (see Figure 21A). Schein also discloses when a cursor is moved onto one program column that plural items of commercial information are automatically displayed on a program guide (see Column 22, Lines 3-8).

Referring to claim 7, Schein discloses communicating with an external computer through a computer network (Column 20, Lines 4-9). Schein also discloses displaying further detailed information from an external computer based on address information to display the information when a cursor is moved onto one of the program columns (Figures 21B and 21C and Column 18, Lines 20-43 and Column 19, Lines 51-63).

Referring to claim 8, Schein discloses selecting a program column on a program guide, and displaying program details corresponding to the program column selected and to sequentially display plural items of commercial information included in the program in a part of the display area (see Figures 21A, 21B, and 21C and Column 24, Lines 1-19).

Referring to claim 9, Schein discloses displaying a commercial details screen (see top left window explaining NFL cap in Figure 21C).

Referring to claim 10, see rejection of claim 9.

Referring to claim 11, Schein discloses sponsors for presenting commercial information (Column 22, Lines 10-18).

Referring to claim 12, Schein discloses an address of a computer on a computer network, which provides detailed information of a commercial (Column 20, Lines 1-17 and Column 18, Lines 20-43).

Referring to claim 13, Schein discloses communicating with an external computer on a computer network (Column 20, Lines 4-9). Schein also discloses extracting the detailed information of the sponsor's commercial from the external computer by using

Art Unit: 2611

the address information of the computer (Column 18, Lines 20-43 and Column 20, Lines 51-54).

Referring to claim 14, see rejection of claim 2.

Referring to claim 15, see rejection of claim 3.

Referring to claim 16, see rejection of claim 6.

Referring to claims 17-21, see rejections of claims 8-12, respectively.

Referring to claim 22, see rejection of claim 16.

Referring to claims 23-24, see rejection of claims 20-21, respectively.

Referring to claims 25-26, see rejection of claims 25-26, respectively.

Referring to claim 27, see rejection of claim 6.

Referring to claims 28-30, see rejection of claim 27.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yuen et al. (U.S. Patent No. 6,477,705) also reads on the independent claims by teaching an EPG that displays advertisement description data in a separate window automatically when a program is highlighted in the program listings window.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason P Salce whose telephone number is (703) 305-1824. The examiner can normally be reached on M-Th 8am-6pm (every other Friday off).
